

CTE in Oregon

The Oregon economy is experiencing a skills gap...

50% of jobs in Oregon require skills training—more education than high school but less than a four-year degree.

45% of Oregon workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Oregon's key industries, like:

- advanced manufacturing
- food and beverages
- forestry and wood products
- outdoor gear and apparel

On average, high school CTE students in Oregon earned \$2,200 more annually six and seven years after graduation than non-CTE students.

Many students are already enrolled in CTE in Oregon, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2019-20 school year, Oregon had:

89,239

secondary CTE participants

49,572

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

10,506

postsecondary credentials earned by CTE students in Oregon (2019-20)

More investment is needed to scale CTE programs across Oregon to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
