When APPLIED TECHNICAL LEARNING is integrated with RIGOROUS ACADEMICS, students develop the SKILLS NEEDED FOR SUCCESS.

The technical, academic and employability skills that students gain in CTE programs, through CTE courses, work-based learning, career and technical student organizations and dual/concurrent enrollment, are essential for college and career success.

CTE programs prepare students for college and careers: 1

The top 3 SKILLS and experiences that students report gaining in their CTE classes are:

1. **SKILLS to help them get jobs in the future**
2. **REAL-WORLD EXAMPLES to help them understand academic classes**
3. The chance to work as PART OF A TEAM

More than 88 percent of CTE students are planning to continue on to postsecondary education.

6 in 10 students are planning to pursue a career related to the CTE area they are exploring in high school.

Almost 1/3 of CTE students have the opportunity to earn college credit and/or an industry certification through CTE.

CTE students demonstrate the academic, technical and employability skills needed for postsecondary and workplace success:

- 80 percent of students taking a college prep academic curriculum with rigorous CTE meet college and career readiness goals, compared to only 63 percent of students taking the same academic core who did not experience rigorous CTE. 2

- CTE students are significantly more likely to report developing problem-solving, project completion, research, work-related, communication, time management and critical-thinking skills during high school. 4

- Students attending CTE high schools demonstrate higher rates of on-time graduation and credit accumulation and a greater likelihood of successfully finishing a college prep math sequence. 3

- Postsecondary CTE concentrators earn significantly more than those who majored in academic fields, particularly when employed in an industry related to their program of study. 5
