

# A Brief History of CTE

On February 23, 1917, the Smith-Hughes National Vocational Education Act was signed into law, launching the federal investment in career and technical education (CTE). Since then, federal CTE policy has evolved in response to changing U.S. economic and social conditions. Follow along as we highlight major legislation and other activities throughout more than 100 years.

**1926**

The **American Vocational Association** was created from the National Society for Vocational Education and the Vocational Education Association of the Middle West.

**1946**

Federal dollars for vocational education were more than doubled to \$29 million per year in the **George-Barden Act of 1946**, which added funding for two student agriculture-related organizations (Future Farmers of America and the New Farmers of America) and set limits on equipment spending.

**1963**

Vocational education was expanded to “persons of all ages in all communities” in the **Vocational Education Act of 1963**. Funding for states was now authorized by student population rather than by field of study, including money for academically and economically disadvantaged and disabled students.

**1976**

Equal opportunities for women and girls were promoted in the **Vocational Education Amendments of 1976**.

**1990**

Contemporary vocational education began to take shape with the **Carl D. Perkins Vocational and Applied Technology Education Act Amendments of 1990**, which embraced accountability, as well as secondary-postsecondary alignment, academic integration and business partnerships.

**1998**

The **Carl D. Perkins Vocational and Technical Education Act of 1998** continued the 1990 Act’s focus on alignment and integration. It created the reserve fund in states and modified state authorizations so that 85 percent of funding would reach local agencies.

In the same year, the American Vocational Association was renamed the **Association for Career and Technical Education**, reflecting a change from job-specific vocationalism to skill-based, rigorous career education.

**2011**

While still written into legislation, federal funding for **Tech Prep** was terminated.

**2018**

Congress approved a **Fiscal Year 2019 appropriations bill** that increased funding for Perkins by \$70 million, a significant increase in the federal investment in CTE, bringing the total to nearly \$1.263 billion.

**1917**

The federal role in CTE began 100 years ago with the **Smith-Hughes National Vocational Education Act of 1917**. This legislation marked the first federal investment in secondary vocational education, providing funding to the states for agriculture, home-making, and trade and industrial education.

**1936**

The **George-Deen Act of 1936** appropriated \$14 million per year in federal funds and broadened their use to include teacher education and training for marketing occupations.

**1956**

The **George-Barden Amendments of 1956** included funding for area vocational centers and added practical nursing and fishery occupations to the list of eligible education programs.

**1968**

The **Vocational Education Amendments of 1968** was the first vocational legislation to officially reference postsecondary students. It extended set-aside funding for students from specific populations.

**1984**

Vocational legislation was renamed after Carl D. Perkins, a representative from Kentucky and education advocate, with the **Carl D. Perkins Vocational Education Act of 1984**.

**1994**

The **School-to-Work Opportunities Act of 1994** linked work-based and school-based learning, supported by partnerships with industry. It expired in 2001.

**2006**

The term “vocational education” was also retired in the **Carl D. Perkins Career and Technical Education Act of 2006**. Perkins IV introduced programs of study as a new unifying concept for CTE, with \$1.3 billion supporting two funding streams—the Basic State Grant and Tech Prep.

**2018**

The **Strengthening Career and Technical Education for the 21st Century Act** (Perkins V) continued the prior law’s focus on programs of study and made important updates to afford states and local recipients more flexibility, prioritize stakeholder engagement and data-driven decision-making through a new comprehensive local needs assessment, streamline accountability measures, reduce Secretarial authority, enhance efforts to serve special populations and encourage innovation through a competitive grant program. Full implementation begins in the 2020–21 school year.
