

METHODS OF INSTRUCTION FOR CTE INSTRUCTORS

Have the skills of a subject matter expert, but little or no teaching experience? Methods of Instruction for CTE Instructors will lay the foundation for methods of teaching styles, learning styles, writing objectives, classroom management and effective assessments. The Purpose of this course is to introduce teaching and learning concepts and the application of a variety of methods of instruction, classroom presentation, and classroom management. This is a guided learning course with the facilitator evaluating forum discussions, activities and final paper.

Professional development credits may be available through Alaska Pacific University.

Topics

Teaching Methods/Styles
Learning Styles
Responsive Teachers
Create Learning Objectives
Classroom Management
Assessments

January 15-April 8, 2020

Upon successful completion of this course, participants will be able to:

1. Analyze their present teaching practice in relation to teaching and learning theories,
2. Discuss learning theories and myths and explain how they can apply these theories in the classroom and laboratory environments to enhance the students learning experience,
3. Develop objectives,
4. Effectively manage the learning environment to provide effective instruction and provide a non-threatening environment for students, and
5. Develop training assessments
