ACTE DIVISIONS
Program Areas of Interest for ACTE’s Members

Trade and Industrial Education
- Includes more than 11 special interest sections, such as Work-Based Learning, Instructional Management & Materials, Special Populations, ROTC and more.

New and Related Services
- Provides high-quality training and networking opportunities for our members.

Administration
- Influences national policy, promotes high standards and develops sound practices across trade and industrial education programs.

Agricultural Education
- Provides high-quality training to the diverse educators serving in CTE fields.

Business Education
- Prepares individuals for STEM-related careers, including engineering, technology, design and applied aspects of science and mathematics.

Marketing Education
- Edutes today’s students for tomorrow’s business community. Our members bring a wealth of experience directly from industry and prepare youth and adults for such careers as advertising, marketing and sales.

Family and Consumer Sciences Education
- Empowers individuals and families across their life span to manage the challenges of living and working in a diverse and complex society.

Health Science Education
- Educates today’s students for tomorrow’s health care community. Our members bring a wealth of experience directly from industry and prepare youth and adults for such careers as nursing, dental hygiene and medical technician professions.

Counseling and Career Development Division
- Designs, implements, and evaluates career development programming to support CTE, career decision making and career pathways in a variety of K-16 settings.

Engineering and Technology Education
- Educates today’s students for tomorrow’s business community. Our members bring a wealth of experience directly from industry and prepare youth and adults for such careers as engineering, technology, design and applied aspects of science and mathematics.

Postsecondary, Adult and Career Education
- Provides high-quality training and networking opportunities for our members.

Professional Standards
- Includes agricultural sciences teachers (K-16), state agricultural education leaders and university educators who support students preparing for successful careers and a lifetime of choices in the global agricultural and natural resources systems.

Markets and Product Development
- Creates, promotes and implements high-quality professional standards across the full spectrum of CTE, and provides professional development and networking opportunities for our members.
