

CTE in Georgia

The Georgia economy is experiencing a skills gap...

54% of jobs in Georgia require skills training—
more education than high school but less than a four-year degree.

42% of Georgia workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Georgia's key industries, like:

- automotive
- food processing
- digital media and entertainment
- warehouse distribution

Georgia CTAE offers
404 industry-certified
programs.

Many students are already enrolled in CTE in Georgia, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2018-19 school year, Georgia had:

385,063

secondary CTE participants

89,669

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

Four-year cohort graduation rate in Georgia
(2017-18)

59,040

postsecondary credentials earned by CTE students
in Georgia (2016-17)

More investment is needed to scale CTE programs across Georgia to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.
