

CTE in Nevada

The Nevada economy is experiencing a skills gap...

51% of jobs in Nevada require skills training—
more education than high school but less than a four-year degree.

48% of Nevada workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Nevada's key industries, like:

- aerospace and defense
- information technology
- manufacturing and logistics
- natural resource technology

89% of Nevada postsecondary CTE concentrators met performance goals for technical skills in 2018.

Many students are already enrolled in CTE in Nevada, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2018-19 school year, Nevada had:

66,724

secondary CTE participants

20,962

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

Four-year cohort graduation rate in Nevada (2017-18)

11,285

postsecondary credentials earned by CTE students in Nevada (2016-17)

More investment is needed to scale CTE programs across Nevada to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.
