

# CTE in Vermont

By 2040, Vermont will need  
**10,000** additional workers per year.

Career and technical education (CTE) programs can prepare this workforce, particularly in Vermont's key industries, like:

- manufacturing
- renewable energy and green business
- tourism and outdoor recreation
- health care

93% of Vermont postsecondary CTE concentrators met performance goals for technical skills in 2018.

Many students are already enrolled in CTE in Vermont, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2018-19 school year, Vermont had:

**4,728**

secondary CTE participants

**2,949**

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

**1,384**

postsecondary credentials earned by CTE students in Vermont (2016-17)

More investment is needed to scale CTE programs across Vermont to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.
