

CTE in Washington

The Washington economy is experiencing a skills gap...

49% of jobs in Washington require skills training—
more education than high school but less than a four-year degree.

38% of Washington workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Washington's key industries, like:

- aerospace
- agriculture and food manufacturing
- clean technology
- maritime

100% of Washington postsecondary CTE concentrators earned an industry-recognized credential, certificate or degree in 2018.

Many students are already enrolled in CTE in Washington, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2018-19 school year, Washington had:

315,980

secondary CTE participants

162,406

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

Four-year cohort graduation rate in Washington (2017-18)

39,437

postsecondary credentials earned by CTE students in Washington (2016-17)

More investment is needed to scale CTE programs across Washington to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.
