

CTE in Arizona

The Arizona economy is experiencing a skills gap...

51% of jobs in Arizona require skills training—more education than high school but less than a four-year degree.

46% of Arizona workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Arizona's key industries, like:

- aerospace and defense
- manufacturing
- bioscience and health care
- film and digital media

88% of Arizona postsecondary CTE concentrators met performance goals for technical skills in 2018.

Many students are already enrolled in CTE in Arizona, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2019-20 school year, Arizona had:

125,857

secondary CTE participants

104,682

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

Four-year cohort graduation rate in Arizona (2017-18)

46,284

postsecondary credentials earned by CTE students in Arizona (2019-20)

More investment is needed to scale CTE programs across Arizona to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!

FY 21 Federal Perkins CTE Funding for Arizona
