

CTE in Indiana

The Indiana economy is experiencing a skills gap...

58% of jobs in Indiana require skills training—more education than high school but less than a four-year degree.

47% of Indiana workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Indiana's key industries, like:

- aerospace and aviation
- agriculture
- energy
- advanced manufacturing

Indiana's Next Level
Programs of Study enable high school CTE students to earn up to a year's worth of postsecondary credits.

Many students are already enrolled in CTE in Indiana, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2019-20 school year, Indiana had:

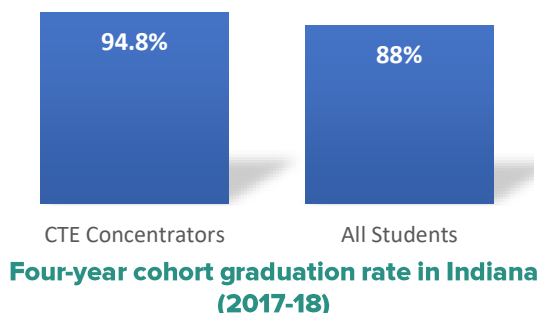

73,848

secondary CTE participants

25,311

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

31,703

postsecondary credentials earned by CTE students in Indiana (2019-20)

More investment is needed to scale CTE programs across Indiana to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
