

CTE in Iowa

The Iowa economy is experiencing a skills gap...

54% of jobs in Iowa require skills training—more education than high school but less than a four-year degree.

49% of Iowa workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Iowa's key industries, like:

- renewable energy and fuel
- information and communications technology
- advanced manufacturing
- agriculture and food production

19,576 Iowa high school students took at least one college-credit CTE course in academic year 2020.

Many students are already enrolled in CTE in Iowa, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2019-20 school year, Iowa had:

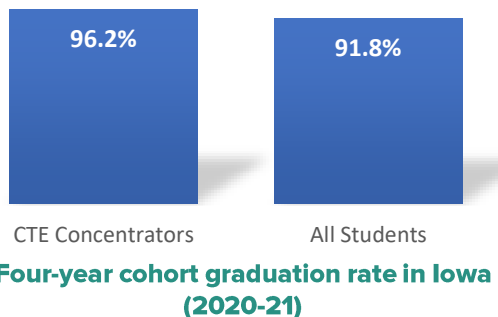

106,519

secondary CTE participants

7,316

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

Four-year cohort graduation rate in Iowa (2020-21)

12,189

postsecondary credentials earned by CTE students in Iowa (2019-20)

More investment is needed to scale CTE programs across Iowa to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
