The Maryland economy is experiencing a skills gap... 

47% of jobs in Maryland require skills training—more education than high school but less than a four-year degree.

37% of Maryland workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Maryland's key industries, like:

- IT and cybersecurity
- advanced manufacturing
- energy and sustainability
- aerospace and defense

Many students are already enrolled in CTE in Maryland, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2019-20 school year, Maryland had:

110,933 secondary CTE participants

54,315 postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

More investment is needed to scale CTE programs across Maryland to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!

67% of high school CTE completers met University System of Maryland admissions requirements in 2021.

13,597 postsecondary credentials earned by CTE students in Maryland (2019-20)

FY 21 Federal Perkins CTE Funding for Maryland

$18,962,621
