The Oregon economy is experiencing a skills gap...  

50% of jobs in Oregon require skills training—more education than high school but less than a four-year degree.  

45% of Oregon workers are trained at this level.  

Career and technical education (CTE) programs can fill these gaps, particularly in Oregon’s key industries, like:  

- advanced manufacturing  
- food and beverages  
- forestry and wood products  
- outdoor gear and apparel  

Many students are already enrolled in CTE in Oregon, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2019-20 school year, Oregon had:  

**89,239** secondary CTE participants  

**49,572** postsecondary CTE participants  

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.  

CFTE Concentrators  

**96.8%**  

All Students  

**79%**  

*Four-year cohort graduation rate in Oregon (2017-18)*  

More investment is needed to scale CTE programs across Oregon to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.  

*CTE: Good for Students, Good for Business, Good for Communities!*  

On average, high school CTE students in Oregon earned $2,200 more annually six and seven years after graduation than non-CTE students.  

**FY 21 Federal Perkins CTE Funding for Oregon**  

**$16,215,001**
