

2023 CTE Innovation Summit Wednesday, March 22, 2023

Join us for the **2023 Career and Technical Education Innovation Summit**. CTE is at an inflection point in defining its high-quality proposition. As we enter an era of post-pandemic strategic education, we face a growing challenge to rapidly and effectively prepare learners for the changing world of work. Attendees will have the opportunity to hear from and ask questions to national experts on issues ranging from the use of AR/VR and Artificial Intelligence for instruction, to what are rapidly growing new programs of study and a look into what's new in specific disciplines. Included in the day-long event will be information from the federal front on where governmental officials see and seek to support innovative CTE activities.
