

# CTE in Nevada

The Nevada economy is experiencing a skills gap...

**51%** of jobs in Nevada require skills training—more education than high school but less than a four-year degree.

**48%** of Nevada workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Nevada's key industries, like:

- health
- information technology
- manufacturing and logistics
- tourism and gaming

High school CTE completers can earn no-cost postsecondary credit that articulates to four of Nevada's community colleges through the CTE College Credit program.

Many students are already enrolled in CTE in Nevada, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2020-21 school year, Nevada had:

**70,475**  
secondary CTE participants

**28,452**  
postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

**11,726**  
postsecondary credentials earned by CTE students in Nevada (2020-21)

More investment is needed to scale CTE programs across Nevada to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

**CTE: Good for Students, Good for Business, Good for Communities!**
