

CTE in South Carolina

The South Carolina economy is experiencing a skills gap...

57% of jobs in South Carolina require skills training—more education than high school but less than a four-year degree.

42% of South Carolina workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in South Carolina's key industries, like:

- advanced manufacturing and materials
- agribusiness
- electric vehicles
- distribution and logistics

46,714 industry credentials were earned by South Carolina high school students in 2021-22.

Many students are already enrolled in CTE in South Carolina, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2020-21 school year, South Carolina had:

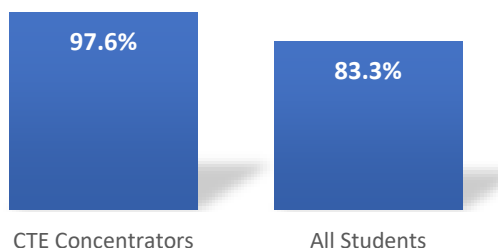

205,250

secondary CTE participants

41,454

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

Four-year cohort graduation rate in South Carolina (2020-21)

15,156

postsecondary credentials earned by CTE students in South Carolina (2020-21)

More investment is needed to scale CTE programs across South Carolina to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
