

CTE in Wyoming

The Wyoming economy is experiencing a skills gap...

55 of jobs in Wyoming require skills training—
more education than high school but less than a four-year degree.

48 of Wyoming workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Wyoming's key industries, like:

- ag tech and food products
- data centers and IT
- wind energy
- outdoor recreation

41% of Wyoming high school CTE concentrators graduated in 2021 with an industry-recognized credential.

Many students are already enrolled in CTE in Wyoming, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2020-21 school year, Wyoming had:

16,707

secondary CTE participants

14,811

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

Four-year cohort graduation rate in Wyoming (2020-21)

2,826

postsecondary credentials earned by CTE students in Wyoming (2020-21)

More investment is needed to scale CTE programs across Wyoming to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
