INTRODUCTION
The Engineering and Technology Education (ETED) Division (the “Division”) is an internal unit of the Association for Career Technical Education (ACTE). Being a Division comes with a certain amount of responsibility; that is, a responsibility to be accountable to its thousands of members. There is also the responsibility to allow for involvement of the membership in order that all may grow professionally.

The organizational structure contained in this manual shows both the structure of the Division within ACTE and the structure of the Division and its Division Associate organizations. Each of these will be explained in detail.

The facilitating body of the Division is carried out through the Policy Committee. The structure of the Policy Committee represents the membership with representation of each ACTE region, ACTE standing committee and may include Division Associates. As stated in this policy manual, the Policy Committee membership has the final authority on all matters concerning the Division.

This policy manual is particularly useful to the official members of the Policy Committee and division committees in carrying out their duties. The information contained in this policy manual will be reviewed at the Division’s annual meeting.
GENERAL PURPOSES

The general purposes of the Division of the Association for Career and Technical Education (ACTE) are:

• To develop high professional standards among the membership;
• To provide for better understanding and appreciation of the program of engineering & technology education among all educators;
• To identify the function of engineering & technology in preparing people for the world of work;
• To act as a clearinghouse for the dissemination of information in promising educational practices and new ideas; to initiate practical research; and to implement plans which will aid in promoting and upgrading the program in various states and territories;
• To foster the development of professional attitudes among teachers and to provide for the professional growth of all functional and interest groups within the Division;
• To inform members of the Division about trends, plans, policies, and current activities of the ACTE and occurrences in the field which have implications for the promotion, development, and welfare of career and technical education;
• To promote professional relationships with other agencies, organizations, and institutions concerned with labor and management and engineering & technology education.
BYLAWS

Unless otherwise stated in this policy manual the Division will work using the ACTE Bylaws.

- The role of executive and other committees
- The role and relationship of the state associations and Division Associate organizations
- The organization’s fiscal year
- How the Bylaws are amended

Bylaws are living documents subject to change as organizational needs change, but there should be relatively few substantive changes. Operational details belong in the Board Policy and Procedures Manual.
