

CTAE in Georgia

The Georgia economy is experiencing a skills gap...

54% of jobs in Georgia require skills training—more education than high school but less than a four-year degree.

42% of Georgia workers are trained at this level.

Career, technical and agricultural education (CTAE) programs can fill these gaps, particularly in Georgia's key industries, like:

- automotive
- agribusiness
- electrical vehicle manufacturing
- logistics and supply chain

25,207 students and more than 10,141 employers participated in work-based learning in 2021-22.

Many students are already enrolled in CTAE in Georgia, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2021-22 school year, Georgia had:

695,063

students enrolled in secondary CTAE

82,695

postsecondary CTAE participants

These youth and adult learners in CTAE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

Four-year cohort graduation rate in Georgia (2021-22)

52,071

postsecondary credentials earned by CTAE students in Georgia (2021-22)

More investment is needed to scale CTAE programs across Georgia to ensure that all learners, including historically underserved learners, have access to high-quality CTAE programs in high-skill, high-wage and in-demand career fields.

CTAE: Good for Students, Good for Business, Good for Communities!
