The Kansas economy is experiencing a skills gap...

54% of jobs in Kansas require skills training—more education than high school but less than a four-year degree.

44% of Kansas workers are trained at this level.

Career and technical education (CTE) programs can develop this workforce, particularly in Kansas's key industries, like:
- advanced manufacturing
- logistics and distribution
- animal health
- energy and natural resources

Many students are already enrolled in CTE in Kansas, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2021-22 school year, Kansas had:

- 54,774 secondary CTE participants
- 30,441 secondary CTE concentrators
- 42,067 postsecondary CTE participants
- 20,732 postsecondary CTE concentrators

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

In 2022, more than 14,100 Kansas high school CTE concentrators obtained postsecondary credit.

Kansas to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
