The North Carolina economy is experiencing a skills gap...

54% of jobs in North Carolina require skills training—more education than high school but less than a four-year degree.

44% of North Carolina workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in North Carolina's key industries, like:

- food processing and manufacturing
- tourism
- energy
- information technology

Many students are already enrolled in CTE in North Carolina, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2021-22 school year, North Carolina had:

- **547,176** secondary CTE participants
- **103,330** postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

More investment is needed to scale CTE programs across North Carolina to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

**CTE: Good for Students, Good for Business, Good for Communities!**

In 2022, 97% of North Carolina high school CTE concentrators pursued postsecondary education, entered the workforce, or joined the military or Peace Corps immediately after graduation.

**FY 23 Federal Perkins CTE Funding for North Carolina**

**$48,462,136**
