

CTE in New Hampshire

The New Hampshire economy is experiencing a skills gap...

52% of jobs in New Hampshire require skills training—more education than high school but less than a four-year degree.

43% of New Hampshire workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in New Hampshire's key industries, like:

- advanced manufacturing
- technology
- health care
- tourism and hospitality

In 2022, more than 1,000 New Hampshire high school CTE concentrators graduated having participated in work-based learning.

Many students are already enrolled in CTE in New Hampshire, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2021-22 school year, New Hampshire had:

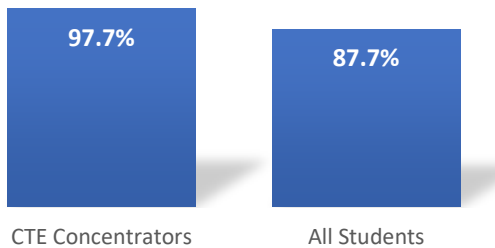

9,678

secondary CTE participants

7,145

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

Four-year cohort graduation rate in New Hampshire (2021-22)

5,309

postsecondary credentials earned by CTE students in New Hampshire (2021-22)

More investment is needed to scale CTE programs across New Hampshire to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
