The Oklahoma economy is experiencing a skills gap...

55% of jobs in Oklahoma require skills training—more education than high school but less than a four-year degree.

47% of Oklahoma workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Oklahoma's key industries, like:

- manufacturing
- automotive
- renewable and traditional energy
- agribusiness

Many students are already enrolled in CTE in Oklahoma, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2021-22 school year, Oklahoma had:

127,238 secondary CTE participants

29,750 postsecondary/adult CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

22,948 postsecondary credentials earned by CTE students in Oklahoma (2021-22)

More investment is needed to scale CTE programs across Oklahoma to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!

FY 23 Federal Perkins CTE Funding for Oklahoma

$18,283,874
