

# GATEWAY EXPERIENCE

June 12-14 2019 || Kenosha, Wisconsin

*The 2019-2020 PLSP-ECMCF Cohort at the The Horizon Center for Transportation Technology, a world-class facility for automotive and diesel technician training and aeronautics-pilot training at Gateway Technical College.*

In June, fellows from the Postsecondary Leadership Success Program at ACTE – sponsored by ECMC Foundation traveled to Kenosha, Wisconsin where they got an in-depth tour and connection at Gateway Technical College, which is one of the nation's best career technical schools!

PLSP-ECMCF Fellow Andrea Golden Pogue tests out medical equipment at Gateway Technical College during a tour of the facilities. Many of the fellows enjoyed the tour of Gateway's campus which allowed them to see first hand the different pathways in Career Tech Education, and how they can play a role.

"Gateway Technical College's administrative staff has incredible passion. This passion has helped their vision develop as they nurture top notch students."

Frank Polen  
Buckeye Technical College, Ohio  
2019-2020 PLSP-ECMCF Fellow

Fellows had the opportunity to meet with Gateway's senior leadership team during their visit. In these sessions, the culture of intentional relationships was evident in the obvious respect and rapport among the team, and the fellows took note of this. Employee retention is a key performance indicator in the college's strategic plan. Future leaders are identified and given opportunities to develop and learn new roles over a long period of time. Along with meeting and interacting with the staff, the fellows enjoyed seeing the high quality career center at Gateway, and the diversity of the programs offered. The Fellows shared that the trip was a success, with lots of information to take back to each of their institutions
