

CTE in Indiana

The Indiana economy is experiencing a skills gap...

58% of jobs in Indiana require skills training—more education than high school but less than a four-year degree.

47% of Indiana workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Indiana's key industries, like:

- advanced manufacturing
- building and construction
- health and life sciences
- transportation and logistics

In 2021-22, Indiana high school students earned more than 158,000 CTE dual credits.

Many students are already enrolled in CTE in Indiana, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2021-22 school year, Indiana had:

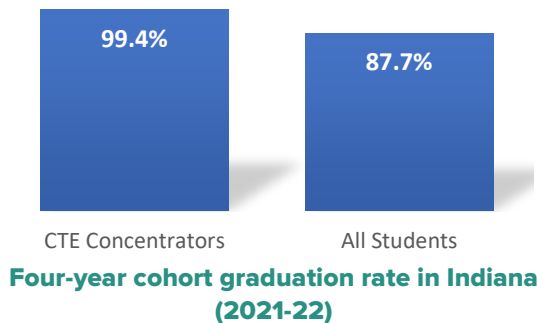

78,825

secondary CTE participants

57,953

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

37,965

postsecondary credentials earned by CTE students in Indiana (2021-22)

More investment is needed to scale CTE programs across Indiana to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
