

CTE in Iowa

The Iowa economy is experiencing a skills gap...

54% of jobs in Iowa require skills training—more education than high school but less than a four-year degree.

49% of Iowa workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Iowa's key industries, like:

- advanced manufacturing
- transportation
- buildings and sites
- renewable energy

In academic year 2021, 30% of all secondary CTE courses were college credit contracted courses.

Many students are already enrolled in CTE in Iowa, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2021-22 school year, Iowa had:

106,928

secondary CTE participants

6,933

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

13,598

postsecondary credentials earned by CTE students in Iowa (2021-22)

More investment is needed to scale CTE programs across Iowa to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
