

CTE in Missouri

The Missouri economy is experiencing a skills gap...

53% of jobs in Missouri require skills training—more education than high school but less than a four-year degree.

46% of Missouri workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in Missouri's key industries, like:

- agribusiness
- construction
- health care science and services
- information technology

More than 13,000 Missouri high school students earned an industry-recognized credential in 2022-23.

Many students are already enrolled in CTE in Missouri, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2021-22 school year, Missouri had:

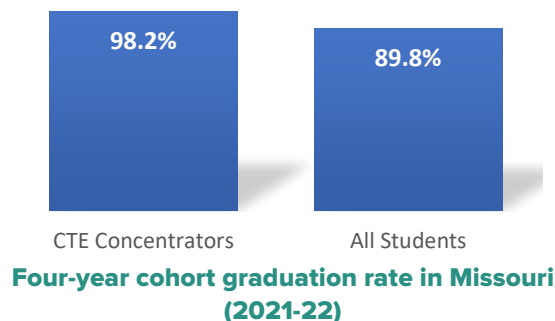

121,639

secondary CTE participants

54,956

postsecondary/adult CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

15,757

postsecondary credentials earned by CTE students in Missouri (2021-22)

More investment is needed to scale CTE programs across Missouri to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
