

CTE in New Jersey

The New Jersey economy is experiencing a skills gap...

52% of jobs in New Jersey require skills training—more education than high school but less than a four-year degree.

37% of New Jersey workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in New Jersey's key industries, like:

- information technology
- manufacturing
- pharmaceuticals
- transportation and logistics

In 2022, 99% of New Jersey high school CTE concentrators and completers pursued postsecondary education, entered the workforce, or joined the military or Peace Corps immediately after graduation.

Many students are already enrolled in CTE in New Jersey, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2021-22 school year, New Jersey had:

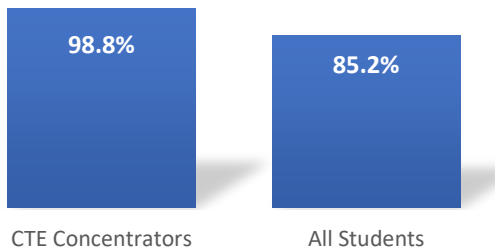

75,842

secondary CTE participants

59,385

postsecondary/adult CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

Four-year cohort graduation rate in New Jersey (2021-22)

24,102

postsecondary credentials earned by CTE students in New Jersey (2021-22)

More investment is needed to scale CTE programs across New Jersey to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
