

CTE in Vermont

By 2040, Vermont will need

10,000 additional workers per year.

Career and technical education (CTE) programs can prepare this workforce, particularly in Vermont's key industries, like:

- manufacturing
- food and beverage
- outdoor recreation
- health care

In Vermont, 37% of CTE graduates leave high school with college credit earned in their program.

Many students are already enrolled in CTE in Vermont, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2021-22 school year, Vermont had:

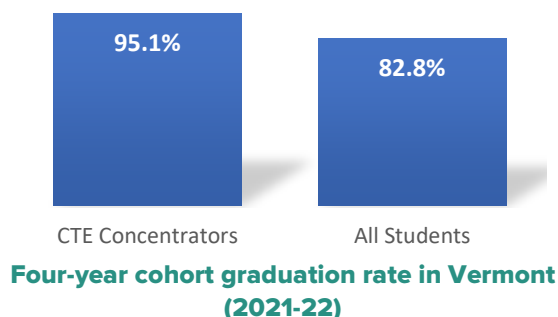

5,999

secondary CTE participants

3,386

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

1,302

postsecondary credentials earned by CTE students in Vermont (2021-22)

More investment is needed to scale CTE programs across Vermont to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
