April 21-24, 2026

Northern Virginia Community College

JOIN THE SCHOOL STUDY VISIT

For educators and administrators to learn about Data Center Operations (DCO) on-site!

This program is for instructors, faculty, administrators, and secondary school educators around the nation to learn about Data Center Operations in Northern Virginia and then take what they've learned back to their institution and service areas. **Participants will spend 2 days on professional learning** with experienced industry professionals at Northern Virginia Community College's state-of-the-art data center training facility in Woodbridge, VA. Participants will also spend 2 days at the nation's largest data center conference – Data Center World in Washington, DC – to learn about the industry and network with professionals. This is part of a DCO Program Development grant (DCO PD), which is intended to expand the national capacity for teaching Data Center Operations.

Who Should Apply?
Educators involved in the following:

- **Engineering**
- **Engineering Technology**
- **Electrical & Electronics**
- **IT & Networking**
- **Cable Fiber & Copper**
- **Plumbing**
- **Diesel Engines**
- **HVAC**
- **Fire Suppression**
- **Building Maintenance**

Participants hotel, meals, and conference registration will be covered!
